GATEWAY TO YOUR DREAM MEDICAL CAREER

WWW.LAUMED.ORG

OUR BELIEFS

THE LEARNING OF TODAY IS THE SERVICE OF TOMORROW

OUR VISION

We aim to become one of the leading internationally acclaimed and respected medical institutions that provide a premier medical education blended with a touch of humanity, basic sciences and clinical research programs, and continuous professional development which is commensurate to the changing world of healthcare and growing needs of the community and which is in sync with the pace of changes in medical sciences and technology.

OUR GOAL

Our goal is to provide quality medical education that is modern, appropriate, and affordable to medical aspirants from all across the world so as to produce socially responsible, professionally skilled, and technologically enabled doctors who are compassionate and who provide care equitably to all sections of the society without any discrimination or bias.

OUR MISSION

We are dedicated to being a transformational institution for premier medical education, wherein the medical aspirants are made capable of delivering comprehensive healthcare to the population in all settings with competence, compassion, care, and confidence; where they are taught to become lifelong learners; where knowledge provided helps in relieving the pain and discomfort of the healthcare recipients and where providing collaborative yet personalized care irrespective of caste, creed, religion and economic status is the foremost strength.

OUR VALUES

Compassion: We provide knowledge to help to relieve the pain and discomfort of those in need.

Inclusion: We promote health care irrespective of the caste, creed, religion, and economic status.

Integrity: We believe in the evidence-based practice of medicine.

Innovation: We invest in the process, and technology for meeting ever-changing health care needs.

Excellence: We provide quality medical education and clinical experience for the practice of medicine.

Ethics: We imbibe ethical professional behavior to promote beneficence, justice and care.

Transparency: We communicate all the facts and discuss openly in an environment of mutual trust and collaboration with all our stakeholders.

WELCOME TO LAU

WHY LAU?

Lincoln American University, School of Medicine (LAU) is a well-recognized and one of the fastest-growing medical universities in the Caribbean which offers international standard medical education to students from all around the world.

Situated in Georgetown, the capital city of Guyana, a beautiful island country in the Caribbean region in 2016, the University is dedicated to bridging the gap between means and the ability to get quality medical education.

In a short span of time, the University has made an impressive impact and has established itself as a reputed medical institution in South America. Currently, 300+ students from Guyana, India, Nepal, Africa, Nigeria, and many more countries around the world are enrolled in our 5-Year MD Program and are pursuing their dream journey of becoming a doctor.

Our medical program features a blend of best practices of US based curriculum, and NMC (India). We involve our students in laboratory experiments, seminars, and research programs, and our pragmatic approach, international clinical experiences, and holistic development outlook including participation in community programs and recreational activities ensures that our medical aspirants turn out to be exceptional doctors and good human beings who also care about humanity!

MESSAGE FROM HIS EXCELLENCY

It gives me immense pleasure to learn that Lincoln American University at Guyana is taking progressive steps to become a leading provider of medical education in the Caribbean region for the benefit of both the local and international students. I wish the entire team of Lincoln American University all the success in their endeavours.

It has been a tremendous pleasure for me to be able to assist the future generation of new-age doctors in achieving their dreams of becoming a successful doctor and contribute with one of the greatest services of the human kind.

Lincoln American University has proven to be one of the most popular choices among the young students of not only Guyana but also of several other countries like that of India. I personally appreciate the initiatives of LAU in providing access to quality education to all the future generations of doctors and are continuously working to create more opportunities and resources for the students and ultimately for the wellbeing of the entire human kind.

H.E. SHRI CHARANDASS PERSAUD

HIGH COMMISSIONER OF GUYANA TO INDIA

I am very happy to see that every year more and more students are opting to go to Guyana for their higher studies. It is an immense pride for me to see so many young minds wishing and working hard to pursue their dream career with LAU.

"IT HAS BEEN A TREMENDOUS PLEASURE FOR ME TO ASSIST THE NEXT GENERATION OF DOCTORS TO ACHIEVE THEIR DREAM."

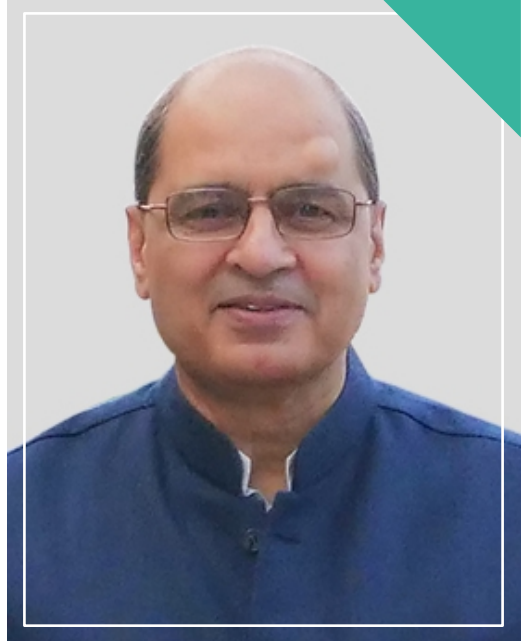

MESSAGE FROM VICE CHANCELLOR

On behalf of the family of LAU, I extend a warm welcome to all of you at Lincoln American University! As a part of Lincoln American University, I feel an immense sense of pride in the achievements of the University in such a short span of time. Our recognition by the prominent medical authorities, consistent impressive performance, and the success of our students in the world of medicine are testimony to our commitment to excellence in medical education.

Our commitment towards you begins from day one - we work along with you each day all through the years that you will spend here at the university. The learned staff members and the ever-accessible management are always with you to guide you through your path and help you nurture your dreams and fulfill them — by empowering you to realize your true potential. We have a perfect blend of academics and a dynamic environment to motivate everyone — the management, faculty, and students to deliver their best.

Guyana is the only English speaking country in South America and, therefore at LAU, the medium of instruction is English with no necessity of learning any other language. The course curriculum is a blend of both the National Medical Commission, India and the US based curriculum. At LAU, our objective is to create a class of qualified, innovative, and dynamic doctors for the society which is in need of committed, dedicated and competent doctors. I invite you to be a part of the exciting world of endless opportunities at Lincoln American University which provides quality education at affordable prices in a conducive environment. I invite you to experience LAU firsthand by engaging with us as a learner in our medical programs because LAU is the Gateway To Your Dream Medical Career.

"I INVITE YOU TO BE A PART OF THE EXCITING WORLD OF ENDLESS OPPORTUNITIES AT LINCOLN AMERICAN UNIVERSITY."

AIR MARSHAL (DR) PAWAN KAPOOR

AVSM, VSM, AND BAR (RETD),
FORMER DIRECTOR GENERAL OF MEDICAL SERVICES (IAF)
VICE-CHANCELLOR, LAU

At LAU, our priority is always the student, be it education, life, growth, teaching, learnings, extra-curricular activities, co-scholastic events and so on. Our entire team is composed of well-trained faculties and professionals. We continuously strive to prove the best of arrangements to ensure quality and comfort of the students.

MESSAGE FROM DEAN

DR. DINESH SINGLA

MBBS, MD, PH.D.

DEAN, LAU

Our efforts and motivation to provide the best possible assistance for all the students have made us one of the leading names for medical studies. We, as a team, strive to cultivate, nurture, and facilitate the determination of all our students in the best ways.

We aspire to change this world through education. This is what motivates the work of each and every individual at Lincoln American University. We believe that every child deserves a high-quality education and providing it is an obligation for every generation towards the ones to follow. I invite you to consider Lincoln American University for your medical training. Our innovative, one-of-a-kind training experience will provide you with the skills needed to meet whatever challenges you may face in the ever-changing healthcare environment.

Our students have the opportunity to be oriented and trained in the medical environment from the early years of their studies by visiting national, private hospitals and medical centers. Highly qualified clinicians, who are experts in their field, are members of the educational team in order to mentor the students in developing the best possible scientific and collaborative skills. I hope that students will enhance themselves through their course of study and clinical experience at this university and become the most competent practitioners, with a lifelong study habit, and a societal perspective to support the health of the people and to meet society's expectations.

Coming from all parts of the world, our students represent a microcosm of the ethos and culture, each with their unique abilities and interests. At this institution, you would interact with the highly competitive, yet collaborative set of peers, developing long-lasting bonds in the process that you can count on.

EVERY CHILD DESERVES A HIGH-QUALITY EDUCATION & PROVIDING IT IS AN OBLIGATION FOR EVERY GENERATION TOWARDS THE ONES TO FOLLOW.

DR. YUSUF ABDULLAH

ASSOCIATE DEAN, LAU

At LAU, we continuously strive to fulfill all the learning demands of the students. As a result, students have shown remarkable performance in the overall global field of medicine & working as successful professionals in different parts of the world.

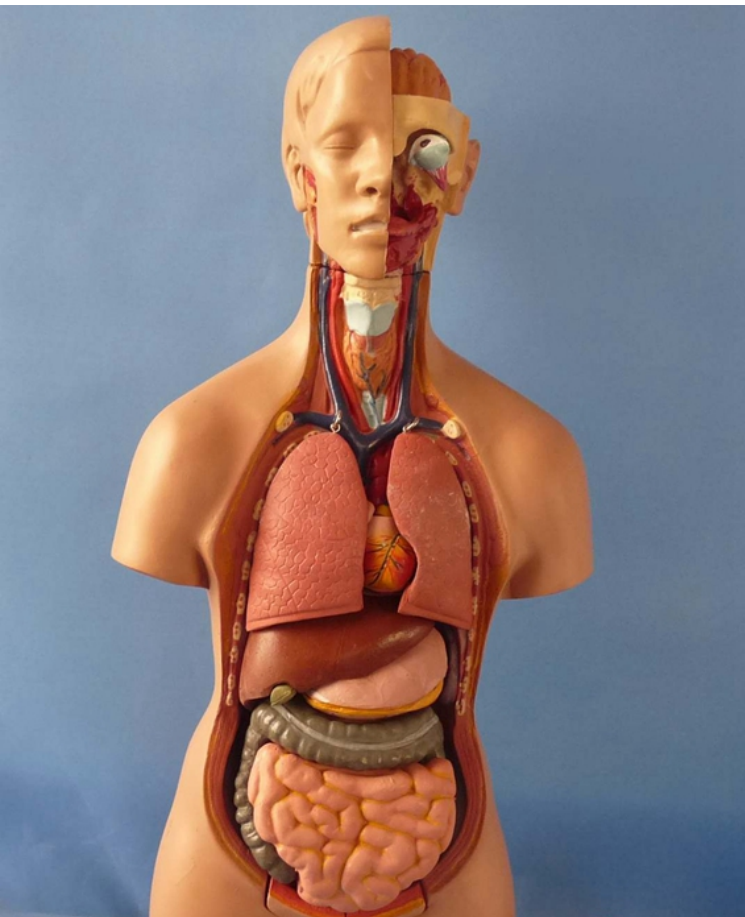

ACADEMIC OVERVIEW

One of the many salient features of LAU is its curriculum. The overall learning experience at LAU is based upon the best practices of US educational practices and it includes the salient aspects of NMC (India) based curriculum. With this the students indulge in manifolds of developments and expertise throughout their duration of studies. The students get to witness and be a part of a stimulating learning environment addressing their individual learning needs and abilities.

At LAU, we offer medical education and clinical training with highly qualified and experienced faculty and modern, tech-equipped infrastructure. We arrange clinical rotations in various countries to let you gain hands-on experience and international exposure and develop the expertise to practice internationally. Here, education goes beyond books and classrooms and where medical aspirants learn more in laboratories and clinics while carrying out experiments and research and dealing with patients under guidance.

To help you get deeper insights, we keep you involved in experiments, seminars, and medical outreach programs. We focus on problem and case based learning. At LAU, we have built a continuously improving medical infrastructure with modern laboratories, world-class faculty, comfortable hostel facility with hygienic food that is expelled by the friendly atmosphere and a culture of academic excellence. Excellency, personal attention, top-notch faculty, international-standard curriculum, experience blended with modernity and technology, community involvement, evidence-based practice of medicine, holistic development approach, education with a touch of humanity, and global recognition are some of the hallmarks of the academic culture at LAU that also prepare you for your next life, as a doctor!

5-YEAR MD PROGRAM

LAU offers a 5-Year MD Program. The entire course curriculum is prepared by a team of doctors, healthcare professionals, and medical researchers following the best practices of medical education in the USA, Caribbean region, and India. The curriculum is well designed to meet the licensing requirements in the United States, Canada, India, and many other countries.

While our international-standard curriculum ensures advanced academic excellence, the practical training imparted during the program in our medical laboratories and affiliated hospitals helps you prepare for the medical challenges you'll face as a doctor.

PRE-CLINICAL

Duration - 1 year

- ☑ Pre Clinical course prepares you to handle the thorough course of study that you'll experience in the subsequent years.
- ☑ During this part of the course, the students are exposed to History of Medicine, Biophysics, Communication Skills, Biochemistry, Introduction to Anatomy, Physiology, Medical Terminologies, Microbiology, Immunology, etc

PARA-CLINICAL

Duration - 2 years

- ☑ The Para-Clinical program follows a system-based curriculum in which topics like embryology, anatomy, histology, physiology, related pathology, pharmacology, quality in healthcare and patient safety and clinical aspects related to each system are completed with the view of imparting holistic approach to each system and understanding the intricacies.

CLINICAL SCIENCES

DURATION - 2 YEARS

Clinical Sciences programme focuses on application of basic sciences skills on patient care. It entails a healthy blend of clinical knowledge together with direct exposure to patient care during clinical rotations in various departments of the affiliated hospitals. The subjects covered are the core subjects of Medicine, Surgery, Obstetrics and Gynecology, Pediatrics, Family and Community Medicine, Critical and Emergency Care, Orthopedics and Behavioral Sciences, Ophthalmology (Eye) and Otorhinolaryngology (Ear, Nose and Throat), etc.

During the rotations, the students will visit the diagnostic facilities viz the Laboratory and Radiodiagnosis with a view to correlate the clinical findings with the diagnostic results

CLINICAL SCIENCE PROGRAM

The Clinical Science program requires the students to go through a rigorous training for 2 years. During this entire time, the students get to have a real-time experience of medical training in some of the leading hospitals.

This phase of the program highlights the development of professional and life skills among the students.

Features of clinical sciences program at LAU:

- ☑ Visit hospitals, observe fellow doctors, take clinical rounds, interact with hospital staff and treat patients under expert guidance.
- ☑ Get hands-on experience in clinical services.
- ☑ Learn to record patient history, perform a physical examination and interpret the findings.
- ☑ Correlate the clinical aspects of medicine to basic sciences and acquire an in-depth understanding of the clinical practice.
- ☑ Analyze lab data, obtain blood samples, carry out vaccinations, diagnose patient cases, and understand life as a doctor.
- ☑ Analyze various radiological reports and correlate with clinical findings.

After completion of the clinical rotations, you will come out as a professional doctor. Our MD Program is a perfect combination of academics and pragmatic experience which makes you an exceptional doctor who is ready to face medical challenges with courage, confidence, intellect, and experience.

In order to accommodate students to locations of their choice where they would like to practice as future doctors, LAU has affiliations with various top teaching hospitals. Like Georgetown Public Hospital Corporation, Guyana, Joseph Mercy Hospital, Guyana and American Clinical Experience, MD, USA, and many more.

CLINICAL ROTATIONS @ LAU

Clinical rotations are the bridge in your journey of transformation from a medical aspirant into a doctor. Clinical rotations form the last two years of the MD Program and provide you an exclusive opportunity to visit hospitals and experience the life of a doctor even before you become one. Clinical experiences are the most exciting as well as the most crucial part of your medical journey.

Most exciting because this is the phase when you enter the “practical world of medicine” and face the real-world challenges, encounter real patients and help give them real cures. Most crucial because this is also the phase when you learn the practical application of medical knowledge you have acquired throughout the years to give the best health care to the patients.

Well, while you experience many moments during clinical rotations including moments of joy for good news, moments of sadness in critical conditions of patients, moments of fatigue when you are in too much demand at the clinic, one thing is sure: every moment is a moment of shared work, empathy, care, and immense learning and all that learning remains with you for life as it is learning gained through real-life incidents and experiences.

During the Clinical Sciences programme the students will be subjected to clinical rotations in the affiliated hospitals in Guyana viz Georgetown Public Hospital and St Joseph Mercy Hospital wherein the students are actively engaged in patient care activities under the guidance and supervision of respective faculty members of various departments

For students interested in pursuing United States Licensing Examinations, there are provisions for doing additional elective clinical rotations after completion of the core clinical rotations in Guyana in the subjects of their choice for a maximum duration of eight weeks in USA through our collaboration with ACE (MD). These rotations will be after completion of the Clinical Sciences program.

Georgetown Public Hospital, Guyana

Manmohan Memorial Teaching Hospital, Nepal

Joseph Mercy Hospital, Guyana, South America

ACE for Clinical Rotation in the USA

Clinical rotations in hospitals in other countries are available depending on the choice of the students.

COLLABORATIONS OF LAU

Lincoln American University, School of medicine has been spreading its roots globally to reach out to the students to make the education more accessible to all the aspiring and determined youngsters. The collaboration also focuses on providing its students with access to the best of the academic resources available to make their overall learning experience more diversified and more insightful.

SHARDA UNIVERSITY

UTTAR PRADESH, INDIA

Our academic association with the Sharda University provides the foundational course to help the students in establishing the basics required to join the LAU campus studies in Guyana.

MAX HOSPITAL

Delhi, INDIA

With this collaboration, the LAU students can complete their observership during their semester break visit to India. The students can get acquainted with the disease profile in India and healthcare delivery system.

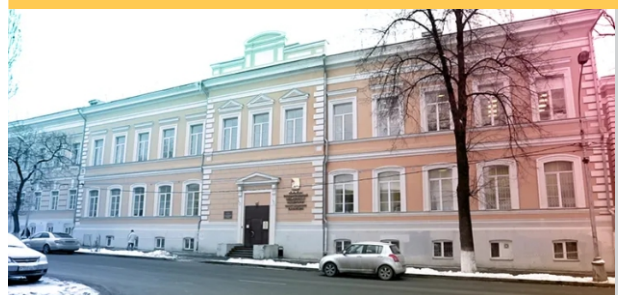

ORENBURG STATE MEDICAL UNIVERSITY

ORENBURG OBLAST, RUSSIA

LAU and Orenburg State Medical University, Russia (OSMU) have joined forces and share an agreement for mutual co-operation to broaden the horizon of medical and career opportunities for their students.

PERM STATE MEDICAL UNIVERSITY

PERM KRAI, RUSSIA

LAU and Perm State Medical University of Russia (PSMU) have joined forces and share an agreement for mutual co-operation to extend the medical and career opportunities for their students.

HOSPITALS FOR CLINICAL ROTATIONS

Our students have been practicing their clinical rotations in some of the leading hospitals of India, Nepal, Guyana, and the USA. The clinical rotations focus on the development of professional and personal skills required among the students.

Max Healthcare, New Delhi, India

Georgetown Public Hospital, Georgetown, Guyana

Manmohan Memorial Medical College & Teaching Hospital, Kathmandu, Nepal

The clinical rotations/observership programs focus on the development of professional and personal skills required among the students. Moreover, during this period the students get to have a real-time experience and observe and work directly with the professionals.

Lincoln American University, Guyana is one of the leading choices for the aspiring medical students from various parts of the world. The university is recognised and accredited by several major national and international statutory bodies governing the standards and norms of medical education.

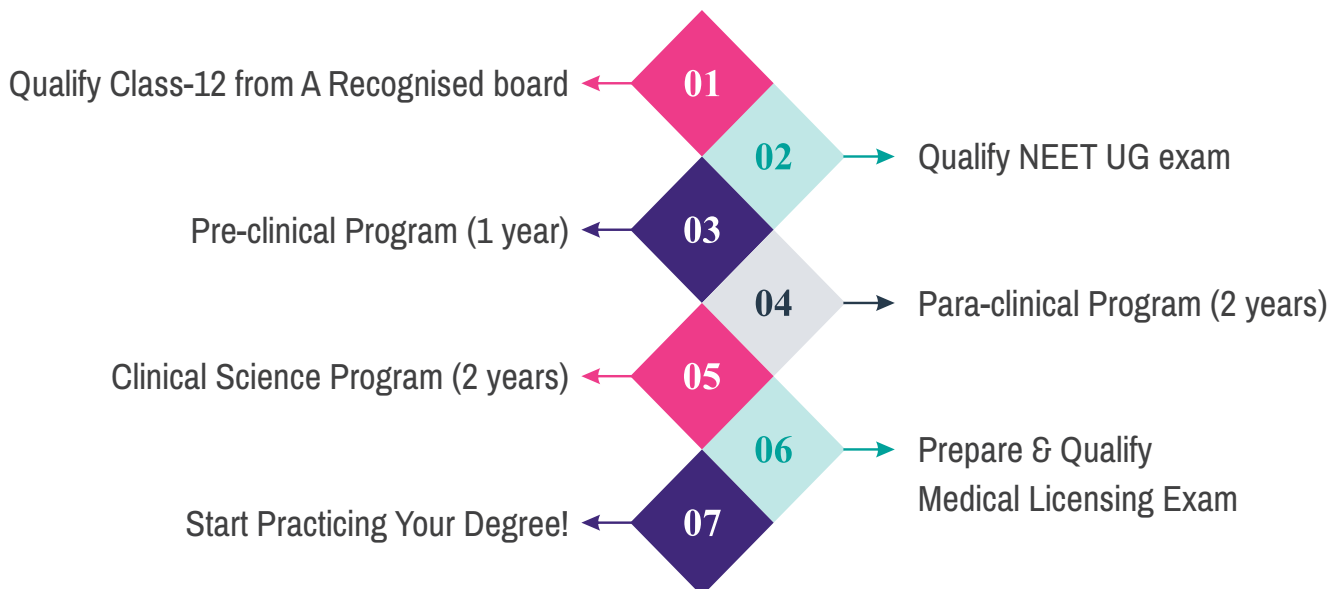

"Lincoln American University has provided us with all world-class education. The faculties and the staff are very friendly with us

**- Sana Zakir Shaikh
from Aurangabad, Maharashtra**

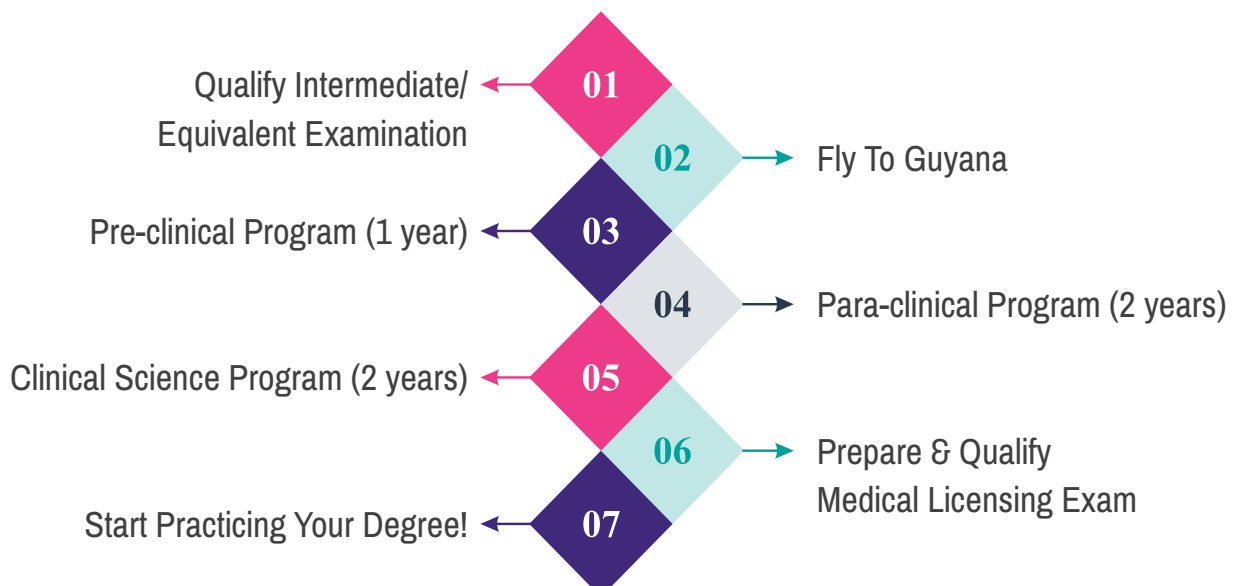

MD PATHWAY AT LAU

With the 5 year MD/MBBS curriculum at LAU, the students participate and get involved in the best practices of the US based curriculum, which proves to be of significant help for the students. Studying MD/MBBS in Guyana the students explore the opportunities of not only working in the leading hospital across the world but also promise themselves an opportunity to attain the prestigious title of working as the residency doctors in the United States.

FOR INDIAN STUDENTS:

FOR INTERNATIONAL STUDENTS:

FACILITIES & SERVICES

CAFETERIA

A place to have hygienic food including continental cuisine. In the cafeteria, you can have a chit-chat with your colleagues and other university members while having your food fun, and relaxing after long hours of work and study.

MODERN CLASSROOMS

Our state-of-the-art teaching technologies and simulation systems help you learn in visual form and keep it in your memory for life. Classrooms are spacious and facilitate proper interaction.

ACCOMMODATION

University-managed hostel facilities provide you with a comfortable living experience in your second home and are equipped with all the facilities required for day-to-day life including Wi-Fi, air conditioners, and surveillance.

RECREATIONAL FACILITIES

To relieve the stress of studies and to cater to the all-around growth, we keep arranging extra-curricular and recreational activities like sports, day-out trips for relaxation, enjoyment and maintain a delicate study-life balance.

At the Lincoln American University, Guyana, we bring you comfort and leisure throughout your stay so worry not about other things and are able to focus on your studies. Our facilities and service not only support you on your journey but also ensure that you do not find yourself alone at any point of the time.

TRANSPORTATION

To ensure safety, security and make the commute easier, LAU arranges the transportation facility for all its students. We are the only university in Guyana to provide the bus facility on everyday basis.

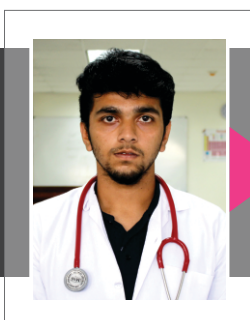

WELL-BEING

We take care of and provide support to maintain the health and well-being of all the members of the university. Ensuring healthy food, proper cleanliness across the entire University area are some of the steps of our well-being initiative.

FINANCIAL AID AND VISA FACILITIES

We believe that money should not limit a student's aspirations. We go the extra mile to assist our students in getting education loans and financial aid wherever possible. We also help get passports and visas on an early basis

“Facilities provided are really great... classrooms... cafeteria, the labs... I would recommend this university to all the medical aspirants”

- Shreyas Shrivastha from Bengaluru, Karnataka

LABORATORIES

To let you unfold your curiosity and unleash your true potential, we have built state-of-the-art laboratories that are equipped with modern medical equipment, testing, and research facilities. In our labs, you get the exciting opportunity to conduct your own medical research, advance the existing findings, innovate and discover something new and build your own legacy and space in the field of medicine.

PHYSICS & CHEMISTRY

The Chemistry Laboratory program provides the foundation to study and understand aspects related to biochemistry, genetics and microbiology. Physics laboratories provide a platform for understanding optics, radiology, nuclear and radiation medicine.

ANATOMY LAB

Our Anatomy Lab provides you with the most advanced anatomical models, both simulated and plastinated to make you understand the basics of medical sciences. This lab helps in increasing your understanding of the basic structure of the human body and its functions.

PATHOLOGY LAB

Pathology and Microbiology lab equips you to understand the cause and effects of various diseases and provides an understanding of microbiology, and pathological basis of diseases together with an understanding of body fluids like blood and urine.

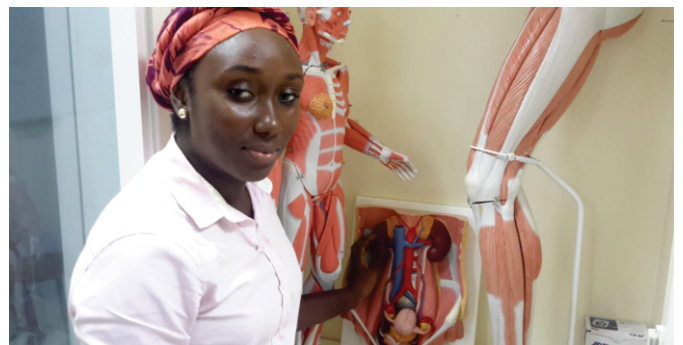

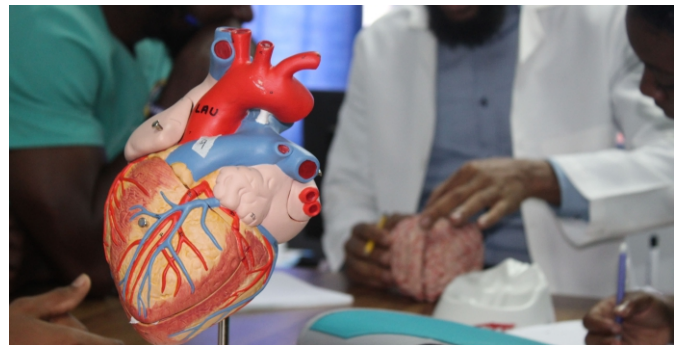

COMPUTER LAB

Our Computer Lab has modern computers and a high-speed internet facility to help you conduct online research with online medical books, journals, and other medical resources on the internet.

ANATOMY LAB

The Lincoln American University provides the facilities of anatomy lab. The lab is well equipped with all the necessary and latest equipment and is managed by professionals. The labs have an ample number of 3-D models and most advanced technical resources to assist and facilitate the student's learning. The university continuously works towards providing access to all the latest utilities for the students.

“At LAU, the laboratories, classrooms, libraries and everything are well equipped. All the resources are available in an adequate number so that it can cater to all of us and we are never short of it.”

- Arushi Tyagi from Delhi

WELL-EQUIPPED LABORATORIES

The laboratories are well equipped with all the essential apparatuses and resources in ample number to suffice the requirement of the students. The laboratories support all the latest and required formats of learnings so that the students can get to have the maximum hands-on-experience.

“This University has helped a lot of students and also me. Because of this university, I can achieve my goal of becoming a successful MD doctor.”

- Devankush Bamne, Mumbai, Maharashtra

CONSTRUCTIVE CLASSROOMS

The classrooms at LAU characteristically use the high-end methodology and expertise during the teaching-learning process. The classrooms are highly interactive with well trained and competent teachers. The methodology used at the LAU classrooms comprises some of the proven student- centric approaches!

“Choosing LAU proved to be one of the best choices I have ever made. The teachers here are really great and super-friendly. They understand our concerns and repeatedly clear our doubts with lots of patience.”

– Jyoti Yadav from Palghar, Maharashtra

TARGET USMLE WITH LAU

USMLE is a three-step examination gateway for medical licensure in the US conducted by the Federation of State Medical Boards of the United States (FSMB) and the National Board of Medical Examiners (NBME) to assess students' ability to apply knowledge, concepts, and principles and to demonstrate patient-centered skills. At LAU, the students not only receive US based education but also USMLE coaching with leading facilitators like KAPLAN

MD Program of LAU strictly adheres to USMLE requirements and provides guidance from USMLE qualified professionals which help the students to crack USMLE. We collaborate with world's leading provider of USMLE preparation facilities like Kaplan Medical, to further help our students prepare for the Licensing Examination. Usually, students appear for Step 1 after completion of Basic Medical Sciences, for Step 2 after clinical rotations and Step 3 during residency program. Our USMLE facilities make it easy for the students to qualify USMLE. Once all steps of USMLE are qualified, students can apply for US Medical Licensure.

USMLE STEP 1

After Basic Medical Sciences

USMLE STEP 2

After Clinical Rotations

USMLE STEP 3

After MD Program - During Residency

After completing the clinical rotation in Guyana, the student can enroll in the 6 weeks elective at USA in the subject in which they seek their residency or specialization.

**Special Kaplan USMLE Preparation Program
For Lincoln American University Students**

KAPLAN

TARGET NExT WITH LAU

The well researched curriculum at LAU matches with the prescribed requirement of the NMC curriculum for the NExT. The internal assessment and external evaluation including clinical and practical examinations is based on the pattern of the NExT examination. This helps the students to perform better at the exam and achieve greater heights.

INTERNSHIP & REGISTRATION IN INDIA

For internship in India, currently the students have to qualify the Foreign Medical Graduate Examination conducted by the National Board of Examinations, India. This is likely to be replaced by National Exit Test 1, shall form the basis for provisional registration, start of internship and Post Graduate selection of both the domestic and foreign medical graduates. NExT 1 is expected to be Multiple Choice Questions Examinations.

The medical licensing of India, FMGE, is being replaced with the National Exit Test (NExT) from 2023 onwards. The proposed NExT pattern follows a 2-step examination schedule. The NExT-1 would be an objective examination determining the eligibility of the candidates for:

- ☑ Provisional Registration in National Medical Commission (NMC) or State Medical Council (SMC)
- ☑ Starting of Medical Internship in India
- ☑ Selection in the PG Courses

After completion of NExT 1, the students will have to qualify the NExT 2 Examination which will be purely based on clinical acumen and skills and will be marked as Pass or Fail. On passing of NExT 2, the students shall be eligible for permanent registration in National Medical Commission and the State Medical Council.

EXCURSION, TOURS & PICNICS

At Lincoln American University, the students are provided with a holistic learning approach. The university arranges frequent events and activities so that the student's learn even outside the classroom. These events also include the students experiencing the country's delights.

The university frequently arranges out-of-the classroom activities for the students to make their overall learning experience more eventful and memorable. Such activities not only help in building team rapport and thus nurturing their personality and leadership skills but also let them explore the country with their own experience.

INDIAN REPUBLIC DAY CELEBRATIONS

At LAU, the students can not only find but also create their own home. Amongst the many events, the LAU campuses also witness the celebration of several festivals and historic days such as Independence day, Republic Day and others.

Students and members of LAU with High Commissioner of India to Guyana H.E. Dr. K. J. Srinivasa

The Indian students at LAU celebrate the Republic Day of India with immense joy and enthusiasm. The students present a variety of performances including that of dance, music, skits, and others to share the pride of being Indian.

HEALTH OUTREACH PROGRAMS

The students and faculties at LAU constantly participate in multiple health-outreach programs with the sole purpose of learning and servicing. The students get to interact with the locals and gain the essential skills for public dealing, stress management and others which would help them during their service days.

STUDENTS AT HEALTH EXPO

Pursuing medical education in the world-class, learner-centric Caribbean Medical schools amidst natural, beautiful surroundings is a pleasure difficult to put into words, something that can only be experienced and not described. Given below is a glimpse of what the Caribbean Medical schools have for you.

Studying at LAU has been a wonderful experience for me, I have got to know so many wonderful people. Every day there is always something new, something exciting happening apart from the classes that keeps us on edge and makes the learning more exciting. There is never a dull day!. - **Marrisa Williams From Guyana**

LIFE @ LAU

The LAU campus brings the students a blissful and colorful environment full of learning and growth opportunities. The students get to interact with their peers from various parts of the world who have joined them on their journey to become successful doctors. Be it the regular classroom scheduled day, celebrations, outings and other things, the students at LAU get to experience a diversified life that keeps them up beat and also adds on to their personality development.

“Studying at LAU is full of learning as well as fun. We get to participate in various activities every other day. Be it visiting historical sites, beautiful sceneries or participating in various sports events, there is never a dull day here.”

- Daanish Bal Saxena from Panchkula, Haryana

STUDENT DEPARTURE & ARRIVAL

Every year a lot of students join LAU for their medical education from India. These students depart from India with dreams in their eyes of becoming a world class physician. LAU helps the students in realising their dreams.

The students are guided through their next destination in Guyana with a team of representatives from the university and help them to adjust to their new lifestyle. The team of LAU continuously engages and assists the students through the entire process of settling down and greeting them warmly to make them feel comfortable in the new environment.

HOSTELS & INDIAN MESS

Lincoln American University was started with the motive to provide a friendly and healthy environment of medical excellence for the students. Hostels at LAU provide a comfortable living experience where the students live peacefully, feel safe and accompanied, groom their personality, and make the most of their medical education extremely memorable.

The LAU canteens also serve the traditional Indian food in its canteens for the Indian students so that they can find comfort in their home. The food is prepared with the utmost care keeping in mind the nutritional components, hygiene and tastes of the students.

ESTABLISHING NEW RELATIONS & ACHIEVEMENTS

The management of LAU had celebrated the auspicious occasion of Diwali with H.E. Charrandass Persaud, High Commissioner of Guyana to India, H.E. Kamlesh Shashi Prakash, High Commissioner of Fiji to India, H.E. Ria A. Sital, High Commissioner of Suriname to India, H.E. Roger Gopaul, High Commissioner of Trinidad & Tobago to India and others.

LAU continually engages in a variety of means to ensure that all its students receive the best possible education. The meeting between Air Marshal Dr Pawan Kapoor, Vice Chancellor, and Dr. Dinesh Singla, Dean, of Lincoln American University with H.E. Charrandass Persaud, High Commissioner of Republic of Guyana in India, was willing to address the concerns of Indian students regarding their visas.

CELEBRATIONS AT LAU

Lincoln American University is one of the top medical universities in Guyana. Immensely popular among the international students, the university fosters students from various nationalities, ethnicities, nationalities and beliefs, who join the university to pursue a quality medical education.

Celebrating the cultural diversity, LAU constantly organizes events to cater to their local culture and beliefs. As a part of the celebrations, all students of various nationalities celebrate the event with extreme joy and enthusiasm.

HOLI CELEBRATIONS

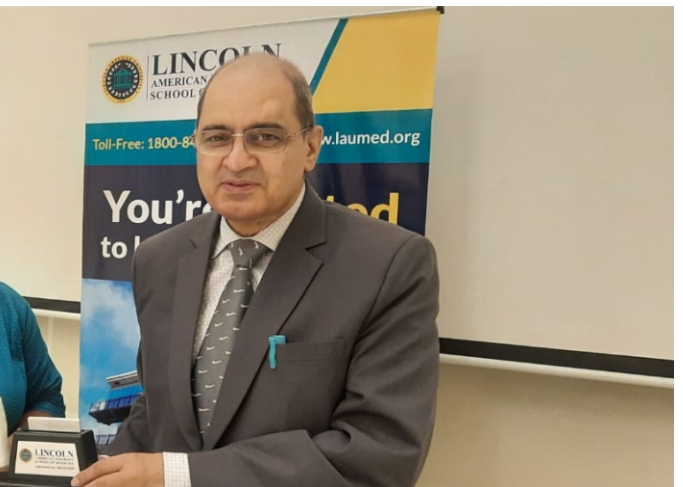

Holi is a popular festival celebrated in the Northern part of India for over centuries. Known to be the festival of colours, it is a symbolic bringer of new joy of a new season. On this occasion, the students of Lincoln American University, studying their first year for the pre-clinical program at LAU celebrated the festival in the traditional way. The students coloured in the aromatic and vibrant colours of gulaal enjoyed the day celebrations with their peers and faculties at the university.

The Indian students and their friends and mentors actively celebrated the festival with vibrant and aromatic colors at the university campus. The blissful event was accompanied with alluring traditional Indian delicacies.

ADMISSION GUIDANCE SEMINARS

In its path to provide authentic, transparent and complete information, Lincoln American University has been conducting MBBS guidance seminars all over the Indian sub continent. The team of LAU conducts the MBBS admission guidance seminars in various parts of India frequently so that the students do not miss any opportunity to participate and follow their dream.

During the seminar, the team of expert counselors of the university assists the medical aspirants who are looking for MBBS Admission in LAU. The interaction with the counselors helps the medical aspirants and their parents see a better picture of MBBS courses in Guyana.

INTERNATIONAL APPEARANCES

Lincoln American University has been an active representative at various International events to not only promote but also raise awareness about medical education. We have participated in events such as Africa's largest international education Summit. The summit was organized to connect African students and the people interested in making higher education more accessible in Africa. During the event, the team also presented itself to H.E. Dr. Kenrick Hunte, High Commissioner of Guyana to South Africa.

LAU team with H.E. Dr. Kenrick Hunte, High Commissioner of Guyana to South Africa

To make the process of admission to the MD Program of Lincoln American University easier for medical aspirants in Nigeria, we participated in the Lekkside Education Fair for September-October 2019, Nigeria's Largest International Education Fair organized by Lakeside Educational Consultant, a Nigeria-based organization helping students in Nigeria pursue higher education overseas.

ANNUAL MEET 2022

Lincoln American University had conducted the Annual Meet 2022, at the beautiful city of Udaipur. As a chief guest, H.E. Charandass Persaud, High Commissioner of Guyana to India joined the Annual meeting to encourage and applaud the LAU team for constantly performing their best and aid the students in achieving their dream of becoming a doctor.

Through the meeting, the academic counselors were guided and commended for their performance last year. The management also shared their future visions and prospects of growth for the university to which the High Commissioner of Guyana promised his full support.

WHO CAN JOIN LAU?

At LAU, our aim is to not only cultivate, nurture and serve the best education but make it accessible for all.

Therefore, we keep our doors open for all the students who are determined to follow their dream and conquer obstacles thrown their way. For studying in LAU, the students do not need to submit any form of donations, or sit in rounds of interviews, or entrance exams. The students simply need to fulfill the standard eligibility criteria as scribed by their respective countries.

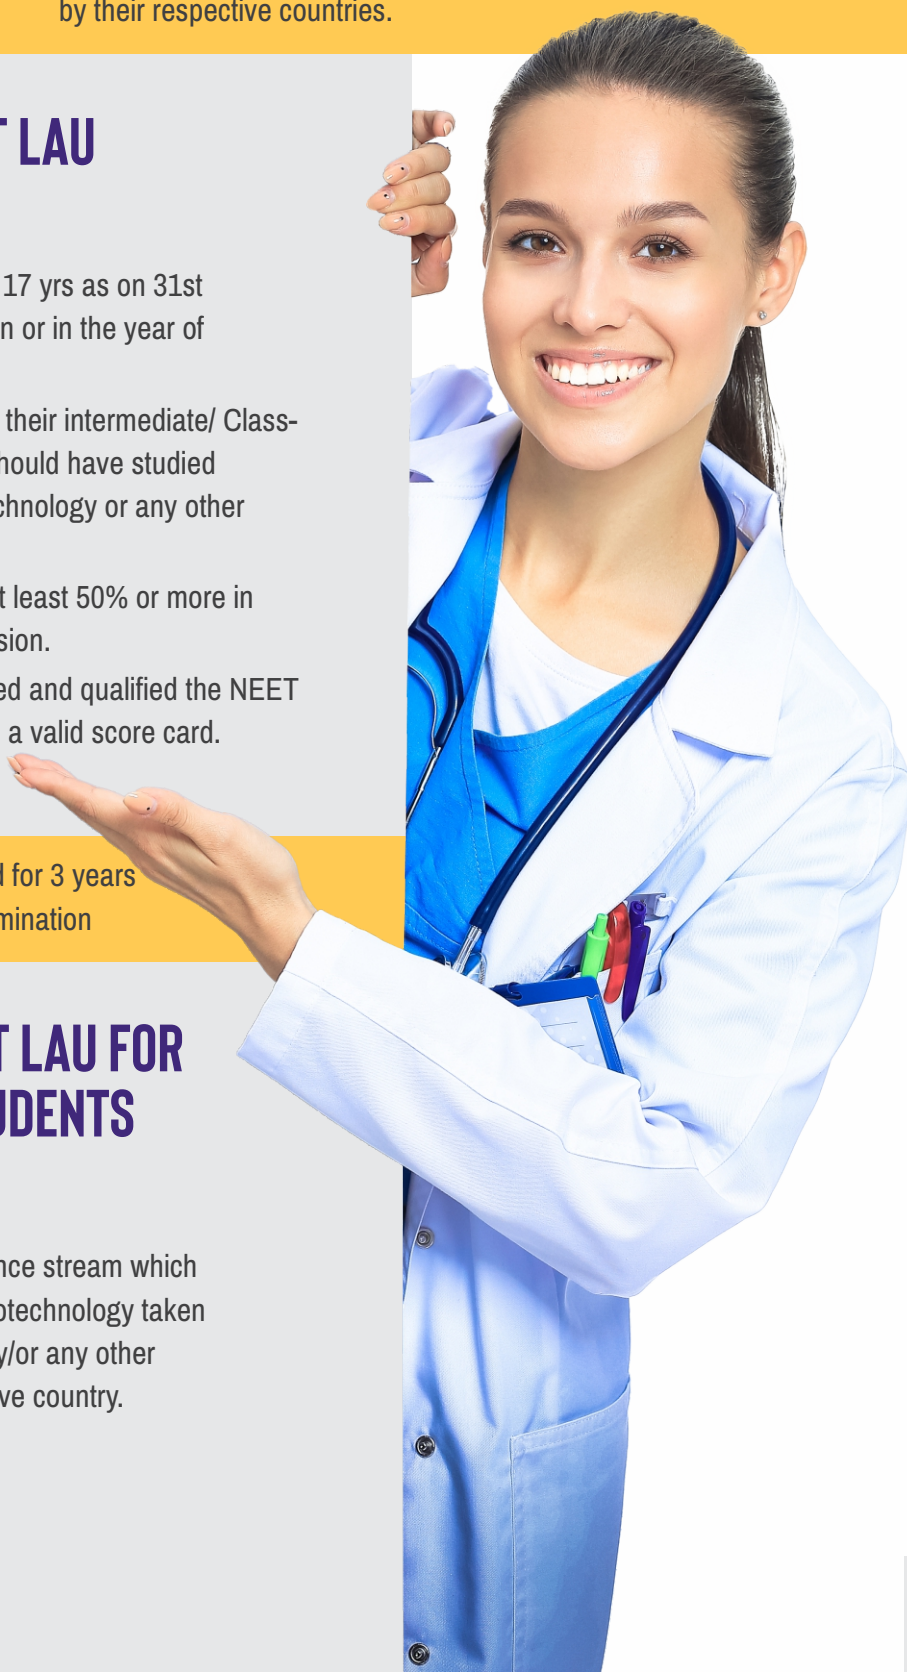

ELIGIBILITY TO STUDY AT LAU FOR INDIAN STUDENTS

- ➔ The student must be of the age of 17 yrs as on 31st December, at the time of admission or in the year of admission.
- ➔ The student must have completed their intermediate/ Class-12 from a recognised board and should have studied Physics, Chemistry, Biology/Biotechnology or any other related discipline as mandated.
- ➔ The student should have scored at least 50% or more in their class-12 at the time of admission.
- ➔ The students should have appeared and qualified the NEET exam. The students must possess a valid score card.

EXPLORE THE DELIGHTS OF GUYANA

Guyana is a Caribbean country in South America and a very strong nation politically, culturally as well as historically! Guyana gained independence from the British rule in 1966. "One people, One Nation, One Destiny" is national motto of Guyana. Naturally rich country has splashing beaches, rivers flowing as long as 1010 kilometers and mountains climbing up to 6696 feet! The country is home to one of the largest rain-forests and globally recognized historical sites like St George's Anglican Cathedral, Georgetown City Hall, Demerara Harbour Bridge, etc. Guyana also enjoys an excellent infrastructure with international airports, highways, education and health facilities and maintains a literacy rate of 88.5%.

In Guyana, one can find diverse kinds of cuisines like Dal Bhat, Chinese Food, Roti, Curry with Guyanese' own set of beverages made of fresh fruits and vegetables. The temperature in Guyana keeps floating from 24°C to 31°C which makes its climate a pleasant experience for all time. Guyana offers a delightful living experience even as you progress ahead in your academic career and pursue your path of becoming a successful doctor.
